

POWER FACTS

2022 IN REVIEW

NV Energy is proud to provide safe, reliable and affordable energy to more than 1.3 million customers, while working toward a clean energy future for the state of Nevada.

YOUR CLEAN ENERGY PARTNER

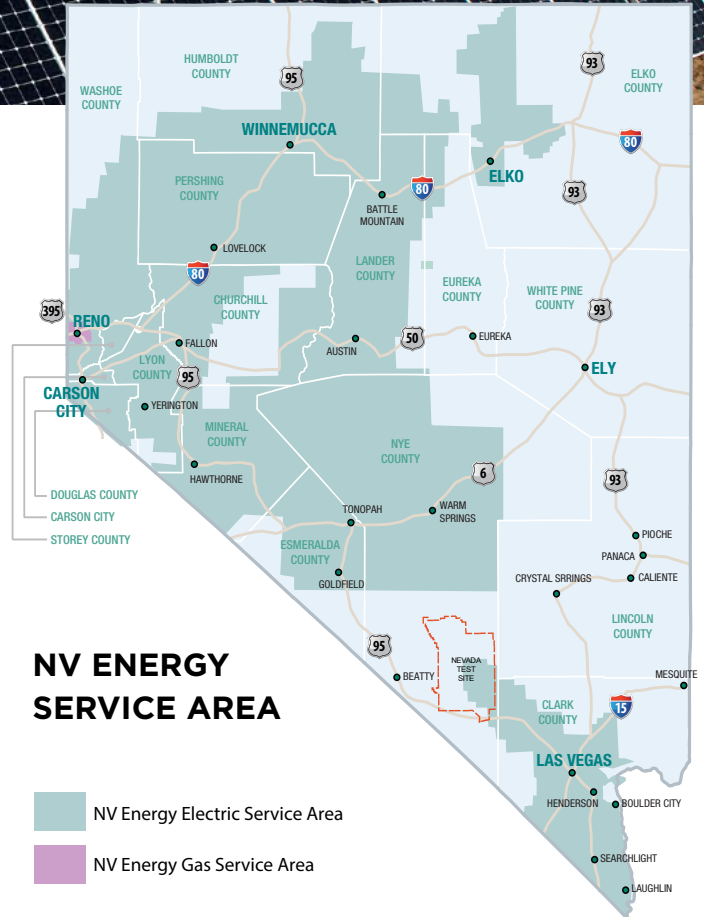

The company helps its customers meet their sustainability goals and drive the development of more clean energy in Nevada through its updated NV GreenEnergy Rider option.

In 2022, more than 460,000 megawatt hours of energy from existing and new renewable resources was made available to customers for an additional fee to offset electricity usage. The NV GreenEnergy Rider is the first clean energy offset option for southern Nevada residential and small to midsize business customers and replaces the existing Green Energy Choice program for northern Nevada customers.

As part of its commitment to help achieve Nevada’s clean energy and decarbonization goals, **the company proposed the addition of more renewable energy and innovative storage solutions to meet customer energy needs during times of highest demand.** This proposal includes 140 megawatts of Nevada-based geothermal energy and the development of a 200-megawatt grid-tied battery energy storage system in northern Nevada.

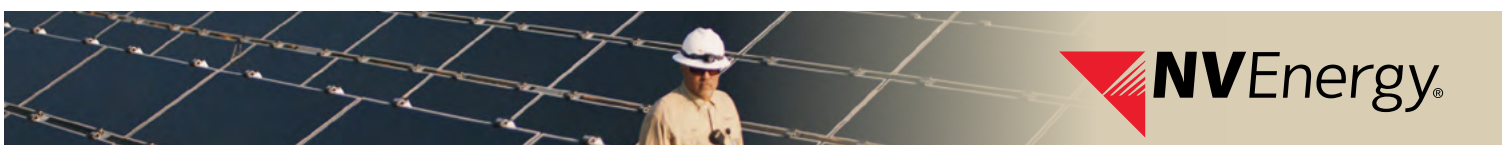

ACCELERATING ELECTRIC VEHICLE ADOPTION

NV Energy filed its Transportation Electrification plan to further accelerate electric vehicle (EV) adoption and expand charging infrastructure for the benefit all customers. The plan lays out a strategy to support the growing number of EVs by providing more programs to ensure charging infrastructure is located where it is needed most. The plan also provides unique programs for low-income and historically underserved communities that help ensure all Nevadans are part of the clean energy economy.

GIVING BACK TO OUR NEIGHBORS

NV Energy continues to make a positive difference in Nevada communities through philanthropic efforts. In 2022, the company, its employees and the NV Energy Foundation gave more than \$4.7 million through financial and in-kind donations, including more than 22,000 volunteer hours to nonprofit organizations across the state¹. More than 80 percent of these donations were made to organizations serving diverse communities in the categories of race and ethnicity, gender and gender identity, military and veteran status, disability status, LGBTQ+, and age.
